I have a 20 year old Rat Shack 10 watt PA amplifier that I use. I run a
cord from the audio of my DJ-580T to the amp. I also use a Motorola
speaker. I can blast anyone out of the vehicle.

I installed a Rat Shack stereo into my XYL's car. The stereo has an external
CD audio jack. Just ran a cord from the audio of her HT to the CD jack and
wah-lah...works like a champ.

These are just two ideas out of thousands you could try.
